[HOME](#) > Product information

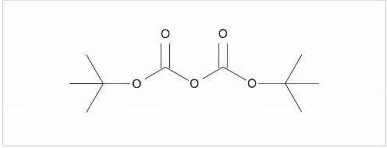

### Product information

① Product code	A00003
② Product name	(Boc)2O
③ Full name	Di(t-butyl)dicarbonate
④ Molecular weight	218.25
⑤ CAS RN	24424-99-5
⑥ MDL No	MFCD00008805
⑦ Storage condition	KEEP COOL & DRY

### Price

⑧ Size	⑨ Unit price ( \$ )
100g	75
500g	282
500gx10	2,249

### ⑩ Structure

⑪ INFORMATION   ⑫ Reference

① Product Code

② Product Name

③ Full Name

④ Molecular Weight

⑤ CAS RN

⑥ MDL No.

⑦ Storage Conditions

⑧ Package Size

⑨ Unit Price

⑫ Reference

◆Example of the product label

- ① Product Code
- ② Storage Conditions
- ③ Quantity
- ④ Product Name, Synonym
- ⑤ Molecular Weight
- ⑥ Lot No.

## How to use the search functions

### ◆ Searching parameters

You can search with multiple conditions.

Search keys are as follows.

- Keyword
- Product name
- Product code
- CAS number
- MDL number

Please note the following points when entering

Search key	How to enter
Keyword	Please enter a product code or a compound name. If you want to narrow down a search target, please enter names separated by spaces.
Product Name	Please enter a product name.
Product Code	Please enter the product code as "1 alphabetic character at the beginning" followed by "5 numeric characters"
CAS RN	Please enter CAS number including -.
MDL No.	Please enter MDL number including MFCD.

### ◆ How to find the SDS

Please enter the product code as "1 alphabetic character at the beginning" followed by "5 numeric characters", select "Japanese" or "English" and select Search. Please contact us if the SDS you are looking for was not found.

### ◆ How to find the ADS

Please enter a character as "1 alphabetic character at the beginning" followed by "5 numeric characters" for the product code, enter the relevant Lot No., and select Search. Please contact us if the ADS you are looking for was not found.

### ◆ Search by category

You can search for your desired product by selecting a category.

Please select a category and select Search.

### ◆ Structure search

Enter a chemical structure and select Search. Search type is either substructure or an exact match.

It is also possible to specify the product name and molecular weight as additional conditions.
